PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of industry experience building production-ready web applications, ERP systems, and REST APIs at Vassu Infotech. Founded DevFlow Technology to deliver custom software end-to-end for SME clients. Skilled in React.js, Node.js, .NET, MySQL, and JWT authentication — consistently shipping scalable, business-focused applications on time.

PROFESSIONAL EXPERIENCE

Software Developer | Vassu Infotech

Feb 2025 – Mar 2026

- Built and maintained 5+ production web applications using React.js, Node.js, and MySQL; reduced client-reported bugs ~30% through systematic testing and code reviews.
- Designed RESTful APIs for business management applications and engineered JWT-based authentication with role-based authorization across multiple live platforms.
- Integrated third-party services and payment gateways; improved technical SEO across 3+ client sites via structured data, page-speed tuning, and Google Search Console monitoring.
- Collaborated in Agile workflows using Git, participating in full SDLC from requirements through post-launch maintenance.

Founder & Lead Developer | DevFlow Technology

2024 – Present

- Founded software consultancy delivering 11+ full-stack projects — ERP platforms, automation tools, and business management systems — from architecture through production deployment.
- Managed cloud hosting on Vercel, Railway, and Hostinger (99%+ uptime); implemented AI-powered automation that cut client data-processing effort significantly.
- Worked directly with clients to gather requirements, define project scope, and execute local/technical SEO strategies driving measurable organic traffic growth.

Web Designer Intern | IT Path Solutions

2023 – 2024

- Developed responsive interfaces using HTML5, CSS3, and JavaScript; contributed UI/UX improvements across multiple client web properties.

KEY PROJECTS

ERP Business Management System [React.js](#) • [Node.js](#) • [MySQL](#) • [JWT](#)

- Multi-module ERP covering inventory, billing, and HR — consolidated 4+ manual workflows; built RBAC with JWT securing admin, manager, and staff roles.
- Designed normalized MySQL schema powering real-time analytics dashboards with dynamic KPI filtering for management.

Construction Tracker ERP [React.js](#) • [Node.js](#) • [MySQL](#)

- Project management platform for tracking site progress, material procurement, vendor payments, and labor scheduling with proactive delay alerting.

Medicare AI Automation Tool [Node.js](#) • [Python](#) • [AI/ML APIs](#)

- AI-powered tool automating patient record processing via third-party ML APIs — improved classification accuracy and reduced manual data-entry overhead.

Real Estate Platform [React.js](#) • [Node.js](#) • [MySQL](#) • [SEO](#)

- Property listing platform with advanced search/filtering, Schema.org structured data, and an admin CMS enabling non-technical staff to manage listings independently.

Security Gate Management App [React.js](#) · [Node.js](#) · [MySQL](#) · [JWT](#)

- Digital visitor & vehicle access control replacing manual logbooks; QR-based entry passes, real-time guard alerts, and supervisor activity dashboards.

Visa Consulting Website [React.js](#) · [Node.js](#) · [Local SEO](#)

- Full-stack consulting site with lead capture, appointment scheduling API integration, and local SEO (Google Business Profile + citations) driving improved search rankings.
